Project Experience

MERN Stack Project: Routes

- Project objective was to design and construct a fully functioning and mobile responsive web application with the MERN stack
- Successfully used graphql and Apollo server to query the database and JSON web tokens to authenticate users.

MVC project: Randonne

- Implemented the MVC paradigm to create a web application for rock climbers to find friends based on their climbing preferences
- Used MySQL and Sequelize to create the database and custom CSS to design the application.

React and Firebase: Tinder Clone

- Created a react app and used NPM packages to mimic the tinder app functionality
- Used Firebase and Firestore as my database

EDUCATION

University of Utah
Full Stack Web Development Certificate
SLC, UT

September 2020 - February 2021

Western Colorado University
Bachelor's of Science- Geology
Gunnison, CO

August 2014-May 2019

SKILLS & INTERESTS

▪ Skills

- **Programming Skills:** React, JavaScript, Mongo, mongoose, Express, Node, SQL, Firebase, HTML, CSS, jQuery
- **Frameworks:** Handlebars, Bootstrap, Bulma
- **Academic Skills:** Object-oriented programming, Data structures, Model-View-Controller, Web-APIs, Third-party-APIs, Server-APIs, Object-Relational-Mapping, Progressive-Web-Applications
- **Personal Skills:** Team Player, Problem-Solving Skills, Solid Verbal and Written Communication Skills, Work Well Under Pressure, Adaptable, Self-Motivated, Easy-Going, and Quick to Build Relationships

▪ **Interests:** Rock climbing, Skiing, Biking, Programming, Geology
